After contact with skin

Change contaminated clothing. After contact with skin, wash immediately with soap and plenty of water. Do not use any solvents or diluents!

After contact with eyes

If the product comes into contact with the eyes, immediately rinse the open eyes with copious amounts of water for at least ten minutes. Afterwards consult an eye specialist.

After ingestion

Immediately get medical attention. Keep the patient calm. Do not induce vomiting.

5. Fire-fighting measures**Suitable extinguishing media**

alcohol resistant foam. Carbon dioxide (CO₂). Extinguishing powder. Water spray.

Extinguishing media which must not be used for safety reasons

High power water jet.

Special exposure hazards arriving from substance or preparation itself, combustion products, resulting gases

Fire gives rise to dense black smoke. In case of fire and/or explosion do not breathe fumes.

Special protective equipment for fire-fighters

Use appropriate respiratory protection.

Additional information

Cool affected receptacles with water. Contaminated fire-fighting water must not get into the sewerage network.

6. Accidental release measures**Personal precautions**

Remove from all sources of ignition. Provide adequate ventilation. Do not breathe in vapours.

Environmental precautions

Do not empty into drains or the aquatic environment. Do not allow to enter the soil or subsoil. Notify the responsible authority when the substance enters open water, the soil, or sewerage system.

Methods for cleaning up/taking up

Absorb with liquid-binding material (e.g. sand, diatomaceous earth, acid- or universal binding agents). Treat the assimilated material according to the section on waste disposal. Do not use any solvents or diluents!

7. Handling and storage**Handling****Advice on safe handling**

Keep away from ignition sources and naked flames. Take precautionary measures against static discharges. Earth receptacles. Wear antistatic work clothing. Only use anti-static equipped (spark-free) tools. Avoid contact with skin and eyes. Do not breathe in vapours or spray mists. When using do not eat, drink or smoke.

Advice on protection against fire and explosion

Concentrated vapors are heavier than air. Fumes may form explosive mixtures with air.

Storage**Requirements for storage rooms and vessels**

Electrical equipment and operating resources must comply with the state of the art. Take precautionary measures against static discharges. Keep away from ignition sources and naked flames. Keep receptacles tightly sealed. Keep opened receptacles upright to prevent leakage.

Advice on storage compatibility

Keep away from: acid. Oxidizing agents. Base.

Further information on storage conditions

Store only in original container. Keep in well sealed receptacles at a cool, dry location. Keep away from ignition sources and naked flames.

Do not store at temperatures over: 25°C

Do not store at temperatures under: 10°C

8. Exposure controls/personal protection**Exposure limit values****Exposure limits (EH40)**

Exposure controls**Occupational exposure controls**

Ventilate adequately storage and work rooms.

Respiratory protection

Respiratory equipment for high concentrations. Filter respirator (full mask or mouth-piece) with filter: A2P2

Hand protectionWear protective gloves. (EN 374)
glove thickness: min. 0,75 mm
penetration time: > 480 min**Eye protection**

Tightly sealed safety glasses. (EN 166)

Skin protection

antistatic.

10. Stability and reactivity**Conditions to avoid**

Stabile under the specified storage conditions.

Materials to avoid

Exothermic reactions with: strong acid and alkalis Oxidizing agents.

Hazardous decomposition productsHigh temperatures can give rise to hazardous decomposition products.
smoke. Carbon monoxide. Carbon dioxide. nitrogen oxides (NOx).**11. Toxicological information****Empirical data on effects on humans**

Inhaling solvent fractions above the air limit can cause damage to health, e.g. irritation to the mucous membranes and respiratory organs and damage to the liver, kidneys, and central nervous system. The typical signs are headaches, dizziness, fatigue, muscle weakness, numbness, and in serious cases unconsciousness. The typical signs are headaches, dizziness, fatigue, muscle weakness, numbness, and in serious cases unconsciousness. Solvents can cause some of the above effects through skin resorption. Repeated and sustained skin contact can cause demoiurisation and irritation. Sprays may cause irritation to the eye and reversible damage.

Further information

The product has not been tested as such. The formulation has been classified according to the conventional method (calculating regulations under EU Directive 1999/45/EG) and the toxicological risks.

12. Ecological information**Ecotoxicity**

Do not let the product enter the groundwater, open water, or the sewerage system. The formulation was assessed according to the conventional method of the directive 1999/45/EG and classified as not harmful to the environment.

13. Disposal considerations**Advice on disposal**

Do not allow to enter the sewerage system.
